

Introduction to Decision Support

Jožef Stefan International Postgraduate School, Ljubljana
Programme: Information and Communication Technologies

Marko Bohanec

Jožef Stefan Institute, Department of Knowledge Technologies, Ljubljana
and
University of Nova Gorica

Addressed Topics

- Decision Making and Decision Support:
 - Basic concepts and definitions
 - Overview of scientific disciplines
- Decision Support at JSI
with examples of projects and applications
- Rationale for including this topic in this ICT programme

Symbols

Important topic:

- required understanding
- possible exam questions

Related to contents of other ICT courses

Pay attention to related slides
above or below

Decision Making

Decision:

*Conscious and deliberate
selection of one alternative (option)
from a set of possible ones
in order to satisfy the goals of the decision maker(s).*

Making a decision:

- involves an irrevocable allocation of resources (time, money, effort, ...)
- has consequences
- is inherently subjective (subject to individual and/or societal values)

Decision Process

Decision Making:

Is a process that involves:

- identification of the decision problem;
- collecting and verifying relevant information;
- identifying decision alternatives;
- anticipating consequences of decisions;
- making the decision;
- providing rationale for the decision;
- implementing the selected alternative;
- evaluating the consequences of the decision.

Typical stages of
Decision Analysis

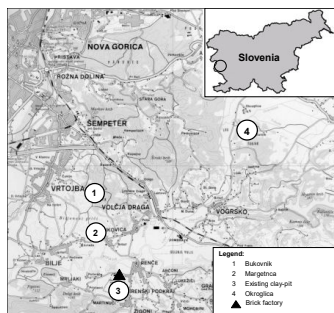

Examples of Decision Problems

- Buying everyday goods
- Buying a car
- Buying a computer
- Choosing an apartment
- Buying a house
- Choosing a job
- Selecting an employee
- Study-related decisions:
which profession, university, study programme, course, ...
- ...
- Investment decisions
- Medical decisions
- ...

Example 1: Clay-Pit Location

Bohanec, M., Rajković, V.: Multi-attribute decision modeling: Industrial applications of DEX. *Informatica* 23, 487-491, 1999.

Example 2: Electric Energy Production Strategy in Slovenia

Project OVJE 2013-2014

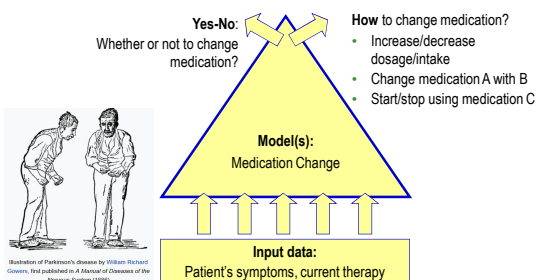

Aims of the study:

- Identify reliable, rational, and environmentally sound production of electric energy in Slovenia by 2050
- Consider technologies: hydro, coal, oil, gas, nuclear, biomass, photovoltaic, wind
- Assess individual technologies and technology mixtures

Kontić, B., Bohanec, M., Kontić, D., Trdin, N., Matko, M.: Improving appraisal of sustainability of energy options - A view from Slovenia. *Energy Policy* 90, 154-171, 2016.

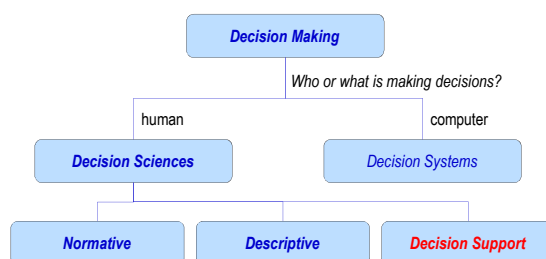

Bohanec, M., Trdin, N., Kontić, B.: A qualitative multi-criteria modelling approach to the assessment of electric energy production technologies in Slovenia. *Central European Journal of Operations Research*, 611-625, 2017.

Example 3: Medication Change for Parkinson's Disease Patients

Marko Bohanec, et al.: A decision support system for Parkinson disease management: Expert models for suggesting medication change. *Journal of Decision Systems*, 27:sup1, 164-172, 2018.
Bijana Mileva Bošković, et al.: Decision support for medication change of Parkinson's disease patients. *Computer methods and programs in biomedicine*, 2020.

Decision Making: Disciplines

Preference Relations

Preference: we like/desire/prefer one thing over another

Preference relations:

- $a \sim b$ indifference
- $a > b$ strict preference
- $a \geq b$ weak preference

Some properties:

- Given any a and b , then $a > b$, $a \sim b$ or $a < b$
- If $a \sim b$ and $b \sim c$, then $a \sim c$
- If $a > b$ and $b > c$, then $a > c$
- If $a \geq b$, then $a > b$ or $a \sim b$

Preference relations are *subjective*!

Decision Theory

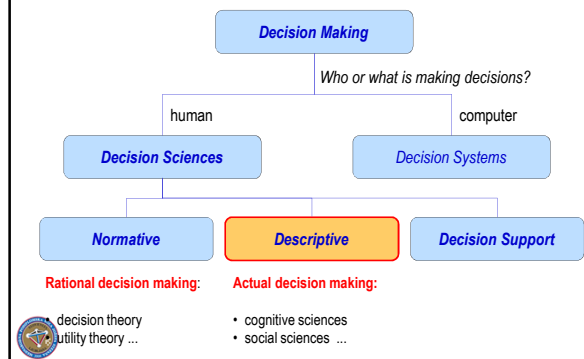

Decision table:

		Alternatives	
		Take umbrella	Do not take umbrella
States	Rains	0.4	0
	Does not rain	0.9	1

CHAPTER 1
The Truth about Relativity
Why Everything Is Relative—Even When It Shouldn't Be

CHAPTER 3
The Cost of Zero Cost
Why We Often Pay Too Much When We Pay Nothing

CHAPTER 4
The Cope of Social Norms
Why We Are Happy to Do Things, but Not When We Are Paid to Do Them

CHAPTER 5
The Influence of Arousal
Why Hot Is Much Hotter Than We Realize

CHAPTER 7
The High Price of Ownership
Why We Overvalue What We Have

CHAPTER 9
The Effect of Expectations
Why the Mind Gets What It Expects

CHAPTER 10
The Power of Price
Why a 50-Cent Aspirin Can Do What a Penny Aspirin Can't

Daniel Kahneman: Thinking, Fast and Slow

Part I. Two Systems

1. The Characters of the Story
2. Attention and Effort
3. The Lazy Controller
4. The Associative Machine
5. Cognitive Ease
6. Norms, Surprises, and Causes
7. A Machine for Jumping to Conclusions
8. How Judgments Happen
9. Answering an Easier Question

Part II. Heuristics and Biases

10. The Law of Small Numbers
11. Anchors
12. The Science of Availability
13. Availability, Emotion, and Risk
14. Tom W's Specialty
15. Linda: Less is More
16. Causes Trump Statistics
17. Regression to the Mean
18. Taming Intuitive Predictions

Part III. Overconfidence

19. The Illusion of Understanding
20. The Illusion of Validity
21. Intuitions Vs. Formulas
22. Expert Intuition: When Can We Trust It?
23. The Outside View
24. The Engine of Capitalism

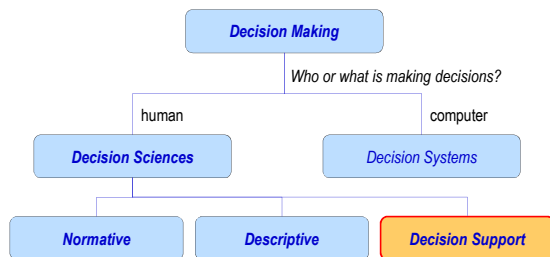

Part IV. Choices

25. Bernoulli's Errors
26. Prospect Theory
27. The Endowment Effect
28. Bad Events
29. The Fourfold Pattern
30. Rare Events
31. Risk Policies
32. Keeping Score
33. Reversals
34. Frames and Reality

Part V. Two Selves

35. Two Selves
36. Life as a Story
37. Experienced Well-Being
38. Thinking About Life

Decision Making: Disciplines

What is Decision Support?

Given the principles of rational decision making, knowing that actual decision making can be difficult for people, can we help the (human) decision makers to make better decisions?

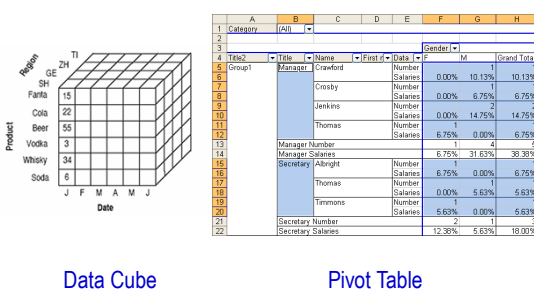

Decision Support:

Providing methods and tools for *supporting* people in making difficult decisions

It is **not**: Making decisions *instead* or *on behalf* of people

How can we support decision making?

Data Storage, Search and Retrieval

Representation and Visualisation Tools

Central Decision Support Disciplines

Decision Analysis

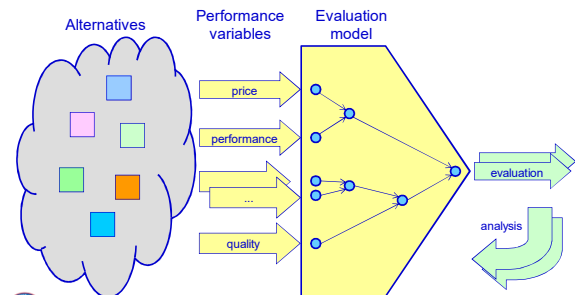

Decision Analysis: "Applied Decision Theory"

Provides a framework for analyzing decision problems by:

- structuring and breaking them down into more manageable parts,
- explicitly considering the:
 - possible alternatives,
 - available information
 - uncertainties involved, and
 - relevant preferences
- developing models for the evaluation and analysis of alternatives
- following a systematic procedure (stages) 
- with the aim to arrive at "sufficiently good" decisions ("satisficing")

Evaluation Models

Types of Models in Decision Analysis

Decision Trees

Multi-Attribute Utility Models

Influence Diagrams

Examples of Decision Models

pairwise comparison

Alternative	A	B	C	D
A		-1	1	0
B			1	1
C				-1
D				

multi-attribute model

Weight	Attribute	A	B	C	D
10	Salary	8	10	6	5
7	Interestingness	4	8	2	6
5	Location	4	2	9	1
5	Safety	4	6	9	2
4	Image	8	9	7	7
3	Promotion	6	4	8	10
3	Co-workers	2	0	4	8
	Evaluation	204	244	228	189

Decision Support Systems (DSS)

Decision Support Systems:

- interactive computer-based information systems
- that support decision-making activities

Characteristics:

- DSS incorporate both data and models;
- they are designed to assist managers in their decision processes in semistructured (or unstructured) tasks;
- they support, rather than replace, managerial judgment;
- their objective is to improve the quality and effectiveness (rather than efficiency) of decisions.

Example: Traffic Control DSS

Omerčević, D., Zupančič, M., Bohanec, M., Kastelic, T.:
Intelligent response to highway traffic situations and road incidents.
Proc. TRA 2008, Transport Research Arena Europe 2008, 21-24 April 2008, Ljubljana.
